With wood fibres from sustainably managed forestry

NEW NATUREgrip

100% ACCOUNTABILITY

The new NATURE grip operating parts are manufactured from bioplastic and are therefore free of petroleum-based source materials. NATURE grip is made entirely from renewable raw materials.

The products are available in a black grey version and a unique wood design with visible beech wood fibres.

- Characteristics:
- Excellent mechanical stability (tested with a minimum of 2x safety factor).
 - Bio-plastics can be recycled
 - Suitable for outdoor use
 - Excellent resistance to strong acids and lyes
 - Short-term resistance to alcohol, fuels, mineral oil and grease

How our NATURE grip series are manufactured

By injection moulding, bio-plastic gradual's are loaded into a machine, heated, plasticised and, with over 1000 bar injected into a mould.

The hot melted plastic is then allowed to set in the 40°C warm moulds. The mould can now be opened and the finished product pushed out.

Examples:

- + Independent from fossil resources
 - + The wood fibres originate 100% from local forests in Germany.
 - + PEFC certified wood products from sustainably managed sources
-
- = 100% accountability
